VAIDEHI GORUPUTI

PROFILE SUMMARY

- **Software Development Engineer (SDE-2) with 5 years of experience in React JS and 1+ year in NestJS**, specializing in designing and delivering scalable, high-performance frontend applications integrated with distributed backend microservices in enterprise-grade retail environments.
- **Proficient in Event-Driven Microservices Architecture**, building asynchronous, resilient, and responsive systems that support high-volume transactions for NextGen Self-Serve Checkout (SCO) platforms.
- **Expert in Frontend Development and UI/UX Optimization**, leveraging React JS, TypeScript, Redux, and Material Design to create responsive, cross-browser compatible, and user-centric applications across multiple domains including Retail, Insurance, Government, Healthcare, and Finance.
- **Hands-on experience in backend services and API integration**, implementing RESTful APIs, RxJS-based adapters, and microservice communication patterns, ensuring robust, maintainable, and production-ready architecture.
- **Proven track record of performance enhancement and system reliability**, achieving up to 25% improvement in application performance and 30% reduction in system errors through code refactoring, optimization, and adherence to clean architecture principles.
- **Agile-driven team collaborator and award-winning contributor**, recognized with "Tech Genie" for technical excellence and part of high-performing teams delivering large-scale projects like MyInsure, MagnifyB, Takamol & HMIS, enhancing enterprise product solutions globally.

CORE COMPETENCIES

- Microservices Architecture
- Event-Driven Architecture
- RESTful API Integration
- Full-Stack Development
- Responsive Web Development
- Agile / Scrum Methodology
- UI/UX Optimization
- Component-Based Architecture
- Performance Optimization
- Cross-Browser Compatibility
- Frontend Development
- Code Refactoring

EDUCATION DETAILS

Bachelor of Technology (B.Tech.) in Electronics & Communication Engineering (ECE) from Gayatri Vidya Parishad College of Engineering for Women, Visakhapatnam, 2020

TECHNICAL SKILLS

- **Web Technologies & Frontend:** JavaScript, TypeScript, HTML, CSS, Bootstrap, React JS, Redux, Material UI (MUI)
- **Backend & Frameworks:** Node JS, NestJS, RxJS
- **Databases:** MySQL, MongoDB, Redis(caching)
- **Cloud/DevOps:** Google Cloud Platform(GCP), GitHub Actions, CI/CD, Docker, Kubernetes
- **Testing:** Jest, Cypress. Cucumber, Gherkin (E2E)
- **Protocols and Messaging:** HTTP, WebSockets, MQTT
- **Tools & Editors:** Visual Studio, Postman, Jira, GIT

SIGNIFICANT HIGHLIGHTS

- Recognized as **"Tech Genie"** for exemplary technical contributions and innovative solutions.
- Contributed to the **Takamol project**, leading the team to receive the **"Best Team" award** for outstanding collaboration and performance.
- Demonstrated commitment to excellence through **team-oriented achievements** and consistent delivery of high-quality results.

WORK EXPERIENCES

NCR Voyix, Hyderabad | Jan 2025 – Feb 2026
Software Engineer II (SDE-2) – Retail Domain

Key Result Areas:

- Designed and developed end-to-end features across frontend (**React.js, TypeScript, Redux**) and backend (**NodeJS**, **NestJS, RxJS**) within an MQTT-based event-driven microservices architecture.
- Spearheaded development of NextGen Self-Serve Checkout (SCO) systems, enabling reliable, high-volume retail transaction processing in distributed environments.
- Implemented asynchronous communication using **MQTT**, supporting real-time device integrations (scanner, cash devices, PIN pads) and inter-service messaging.
- Built and deployed containerized microservices on **Kubernetes clusters**, managing pod deployments to ensure scalability, resilience, and high availability.

- Created architectural documentation and system design workflows using **PlantUML (PUML)**, including sequence and component diagrams for service interactions and event flows.
- Automated feature validation using **Cucumber (BDD)** and **Cypress (E2E)** to ensure regression coverage and production stability.
- **Leveraged GCP Logging & Monitoring for troubleshooting, performance tuning, & proactive issue resolution in production environments.**
- Optimized system performance under peak retail loads, reducing transaction times and improving overall customer checkout experience.

Machint Solutions, Hyderabad | Feb 2021 – Jan 2025
Senior Associate – React JS Developer

Key Result Areas:

- Delivered **enterprise-grade frontend applications** for **Insurance, Government, Healthcare, and Finance** domains, ensuring high-quality user experiences.
- Designed and implemented **scalable, reusable UI components** leveraging **React JS, Redux, JavaScript, and TypeScript** to enhance development efficiency and maintainability.
- Integrated **RESTful APIs** and **Appian services** to build **dynamic, data-driven applications** supporting critical business processes.
- Optimized application performance, achieving a **25% improvement in speed** and a **30% reduction in system errors** through refactoring and best practices.
- Ensured **cross-browser compatibility** and **fully responsive designs**, delivering consistent experiences across devices and platforms.
- **Actively contributed to peer code reviews**, debugging, and **unit testing using Jest and React**, ensuring adherence to coding standards and high code quality.
- Collaborated in **Agile development cycles**, including sprint planning, daily stand-ups, retrospectives, and release management, fostering timely delivery.
- Contributed to **process improvements and team knowledge sharing**, enhancing overall frontend development standards and efficiency.
